

Dear citizens of Duisburg,

we are going through major restrictions of the public and personal life in our city. Lots of shops and public institutions are closed. Reason is the Corona virus, which already claimed victims worldwide and also in Germany and which spreads continually.

To slow down the continual spreading of the virus, we all can become active:

Wash your hands often, regularly and thoroughly.

Avoid every unnecessary social contact and preferably stay at home. Avoid crowds of people and keep a distance of minimum 1.5m (4.9 feet) to other people.

Leave your domicile just to buy food or medicine or to go to work.

Help old and weak people. Offer them actively your help to go buying food, medicine or make important drives.

Together we are capable and we are going to manage to reduce the spreading of the Corona virus and defeat it in the end.

Please share this message to as many people as possible around you and consider the instructions and guidelines of the authorities.

Inform yourself listening to radio or television, on the homepage or facebook page of the city Duisburg or the Robert-Koch-Institute.

Stay healthy.

Yours Sören Link, senior mayor of the city Duisburg and
Yours Erkan Üstünay, chairman of the integration council of the city Duisburg
